

Jushu Launches High-Performance Polyurethane Adhesive for Sports Flooring

Innovative Bonding Solution Enhances Durability and Safety of sports flooring

Anji, China— Anji Jushu New Material Technology Co.,LTD, a leader in advanced binder technologies, today announced the launch of its groundbreaking **polyurethane binder** specifically engineered for sports flooring. Designed for running tracks, sports ground, and multi-purpose athletic fields, this cutting-edge solution delivers unmatched durability, weather resistance, and player safety.

Key Features & Benefits:

- **Superior Bonding Strength:** Ensures long-term adhesion even under extreme temperature fluctuations and heavy foot traffic.
- **Eco-Friendly Formula:** Low-VOC composition aligns with global sustainability standards.
- **Quick Curing Time:** Reduces installation downtime, enabling faster project completion.
- **Enhanced Shock Absorption:** Minimizes injury risks for athletes through optimized energy return.

Quote from Leadership

“Athletic facilities demand materials that perform under pressure,” said CEO/Super at Jushu. “Our polyurethane adhesive redefines reliability for sports surfaces, empowering venues to prioritize both performance and longevity.”

Applications & Market Impact

Ideal for stadiums, schools, and municipal sports complexes, the adhesive is already being adopted by [mention any notable clients, partnerships, or projects if applicable]. Its versatility supports hybrid surfaces, rubber granules, and artificial grass installations.

Availability

The product is now available globally through Jushu’s distribution network. Custom formulations for specific climate or regulatory requirements are also offered.
