COMPANY BROCHURE

DURALOCK PERFORMANCE FENCING

ABOUT US

DISCOVER DURALOCK.

YOU'RE CREATING A UNIQUE SPACE. YOU WANT IT TO BE SAFE AND ELEGANT, WITH FENCES OF EXCEPTIONAL QUALITY.

We've been perfecting our craft and earning your trust for three decades. From a small workshop deep in the English countryside, Duralock has grown into a global industry leader, with clients in more than 40 countries.

When the 300-year-old **Ascot Racecourse** reinvented itself, we were there. When Italy's **Inter Milan** football club needed new pitch barriers, they partnered with us. Five thousand miles away, the **Korea Racing Authority** has relied on us for over 20 years, prizing the peace of mind that comes with Made in Britain quality.

From the desert sands of the **Al Shahaniya** camel racetrack in Doha to the Hollywood razzle-dazzle of California's **Santa Anita Park**. From a royal regatta to a modern shopping mall. Our partners pick us for many reasons. As a family-run business, the three we're most proud of are:

- > **QUALITY**
- > **CUSTOMER SERVICE**
- > **SAFETY AND SUSTAINABILITY**

We led the way as the international horse racing industry moved away from metal or wood barriers towards safer PVCu fencing. Now, we're showing it's possible to build beautiful fences – backed by our 15-year warranty – using recycled materials.

We're exploring new frontiers and spreading our global footprint. But some things will never change. Like our **Duralock stamp of quality**. And our core commitment to you: whether you buy fifty or fifty thousand metres of fencing, if you give us your trust, we'll treat you like family.

LEGACY

OUR STORY & HERITAGE.

Some years ago, we shipped nearly 70,000m of fencing to Qatar. We often wonder whether Marcus Wheeler, the man who founded Duralock, ever imagined such an order when he opened his cowshed workshop in Devon, in South West England.

It was 1991. Marcus had few tools, even fewer employees and the fences Duralock made were mostly for neighbours. Marcus was obsessed with quality. And passionate about horse racing. It wasn't long before his passion and business skills were galloping side by side.

Duralock began to grow, custom building a wide range of products for racecourses. It offered clients complete solutions, from paddock fencing to running rails. As the turn of the millennium neared, the company landed its first international project in Dubai.

A GLOBAL EXPORTER, WITH A PURPOSE.

Our founder, Marcus, owned racehorses and cared deeply about the safety of both the jockeys and the animals. Around the world, we've pioneered the use of plastic rails instead of metal or wooden ones. With rounded edges, a hollow frame and modular design (built to break at fixing points, rather than splintering) PVCu fencing is the safer option for impacts.

Our roots are buried in horse racing, but our branches have grown in all directions. You'll see our fences at rugby games, football matches and golf tournaments. You'll spot them at schools and universities, residential estates and shopping

malls, factories, parks and music festivals.

Today, we export to dozens of countries around the globe. The machines in our factory in Chipping Norton, near the famous town of Oxford, produce ten times as much fencing as they used to. We design solutions using smart software and 3D modelling.

But pop in and you'll watch expert hands crafting intricate gate hinges or wheel arches for mobile fences. You'll meet true artisans, some of whom have been with us for 10 or 15 years. As the milling machines buzz, you'll still hear Marcus' mantra about quality.

ENVIRONMENTAL COMMITMENTS

WE'RE NOT ON THE FENCE.

ACTIONS SPEAK LOUDER THAN WORDS. THAT'S WHY WE'VE:

> Introduced fences made of **91% recycled plastics**. To do this, we've invested more than £150,000 to upgrade our tools. We can use recycled plastics across our range, still offering you a 15-year warranty. (It's 91% because the remainder is a sun resistant "skin" we add each time to make fences last longer.)

> Launched a **new service to recycle our fences** once they're ready to come down. We can collect, reprocess and reuse old Duralock fences in the UK and across Europe, turning them into brand new ones.

> Made sure our **factory offcuts don't go to waste**. Each piece is put back into our circular economy instead of landing up at a landfill. When **replacing equipment or factory forklifts**, we go for battery power, not petrol or diesel.

> Worked to bring our manufacturing closer to our clients. This will help us **cut down shipping** and **shrink our carbon footprint**.

Our fences can stand for a quarter of a century, or longer. The PVCu plastic we use is a safe, durable building material, which is easily recycled. But using it comes at a cost to the environment – and we must play our part in protecting our planet.

ENVIRONMENTAL REPORT DURALOCK COMPREHENSIVE ENVIRONMENTAL SUSTAINABILITY REPORT.

We've hired respected environmental consultants to spend three months **auditing the way we work**. Being honest and transparent about our impact helps us do better.

FUTURE PLANS.

We change with the times. We know growth can't happen without agility. And should never happen at the expense of a thriving planet. Duralock is led by Jonathon McGovern, Marcus Wheeler's grandson. We have offices or associates in seven countries, from America to Australia.

We're exploring opening up new manufacturing hubs in key regions. But our stamp of quality doesn't fall lightly, so we've got some work ahead of us.

EXPANDING OUR REACH MEANS FRESH IDEAS.

Diversity drives innovation. While working with associates around the globe, we're making sure there's diversity within our ranks too. Three out of our five top leaders are female.

Duralock is your partner in quality British-made fencing. In future, we'll be closer to you. With new ideas and products. Navigating our growth with a compass locked firmly on sustainability.

"Our global growth strategy has been designed to ensure we maintain our reputation and relevance in the UK and global markets we service. I am excited to execute this strategy over the next 3 years to ensure we have another 30 years of successful trading."

Jonathon McGovern

INNOVATION

MASTERY MEETS TECHNOLOGY.

We've revolutionised PVCu fencing solutions. Our fences are built using an **award-winning, patented design**. They are UV-stabilised to face the harshest sun. They can be installed as permanent features or wheeled around as temporary barriers (which you can easily reconfigure). We manufacture each modular piece, and can bring any design to life.

SAFETY STARTS WITH SMART DESIGN.

We use CAD and 3D modelling to turn concepts into blueprints. We use **decades of expertise** to help you design your fencing solution, and we take care of the installation. We work with architects and contractors to deliver your projects.

Duralock fences are easy to look after, but if you need us, **we're ready to help.**

EVENTS & EDUCATION

WHEN SAFETY'S A TOP PRIORITY

If you run a school, college or university, few things matter more than keeping the young people in your care safe.

We've worked with some big names in education, including Warwick, England's oldest boys' school. From London to Dubai, we've supported educators by giving them one less thing to worry about.

Our fences are also perfect if you need to tame a long concert queue or mark out a golden circle area. They're strong enough to stand the test of a crowd.

Read more [here](#), or get in touch with us to discuss your project.

THRILL OF THE GAME OUR SPORTS PERFORMANCE RANGE

We're proud to be England Rugby's fencing partner. We've supplied barriers to football clubs like Inter Milan and built boundary fencing at the famous Edgbaston Cricket Ground.

We've worked on athletic tracks, hockey pitches and golf courses to keep players, officials and spectators safe and comfortable.

Our Sports Performance fences are built to last, and need little maintenance. They're approved by international governing bodies, making them ideal for any level of sport, from pro down to grassroots.

Read more [here](#), or get in touch with us to discuss your project.

OUTDOOR & URBAN LIVING BARRIERS FOR BUSY PLACES

Stroll through the London Zoo or the Windsor Great Park (near Windsor Castle), and you'll spot a Duralock fence. If you're in London, shopping at a Westfield mall or dashing to a business meeting in Canary Wharf, your hand might brush against one of our PVCu barriers.

Duralock fences don't warp, split, splinter, peel or discolour. You don't need to paint or varnish them, which helps keep your maintenance budget down. Add wheels, and you can arrange the barriers any way you like, year after year.

Whether you're in nature or in the heart of a city, you'll want a quality fence you can depend on.

SPEED & GRACE

EQUESTRIAN AND CAMEL RACING

Horse racing is the golden thread that runs through our story. It's our heritage. And it's what led us to discover the world of camel racing, a sport steeped in tradition in the Middle East.

We know how the two sports are similar, and where they differ. We know that whether you race a horse or a camel, you can't compromise on safety and strength of the barriers around you. Our fences are there to protect, and are approved by racing governing bodies worldwide.

We design and build running rails, paddock fencing, crowd barriers (permanent or mobile), dressage arenas and dozens of ancillary items, like gates, jump wings and furlongs markers.

Read more [here](#), or get in touch with us to discuss your project.

BESPOKE REQUIREMENTS

UNIQUE SPACES

We've tackled some unique projects. From public spaces to private facilities no challenge is too difficult for Duralock. Our team will work with you to offer a bespoke solution to meet the exact requirements of your facility.
