Yardex is a Fully International Business with Global Supply Links

Working with the Best to Achieve Excellence

We work to provide the best possible results, confirmed by certificates and licenses. We are constantly striving to develop and improve our products and services. The satisfaction of our customers and long-term cooperation with our partners is paramount.

25+ years of experience
1000+ completed projects
safety guard nontoxic materials

Walid Elhusseiny
CEO

” We focus on innovation and flexible solutions to deliver benefits to customers. I founded Yardex to develop a new concept in sustainably produced artificial turf and lead the industry with the latest technology. With more than 25 years of experience and the most sophisticated production machinery, we deliver consistent high-performance turf in the shortest possible time.

Building solid and trustworthy relationships with our customers is the essence of our business. We can help, whether it's artificial turf for a sports facility or field construction project, leisure or landscape turf for a distribution center, retail network or end customer.

Environmental protection touches many areas of our industry. That's why we are constantly working on how we fit into it. In the future, we will continue our research with the long-term objective of responsibly producing fully sustainable products.

A Step Ahead of the Artificial Grass Industry

We are a US company with more than twenty years of experience in the artificial turf industry. We provide top-quality products from the most sophisticated synthetic grass production facilities.

Designed and manufactured in compliance with international standards and our own rigorous quality controls, our durable and resilient products are the best solution for sports, leisure and landscape projects.

Mission:

To provide a one-stop-shop, offering first-class quality artificial grass products, whilst building solid, trustworthy relationships with our clients.

We focus on market differentiation, competitiveness, and timely delivery.

Vision:

Leading the industry in flexible, innovative and sustainable artificial grass solutions.

Our Promise

At Yardex, we work in line with our values to build and maintain solid relationships with our customers and employees, whilst considering the environment. We take responsibility for our actions and results, ensuring that we deliver on our promises and meet our customers expectations.

Ambition:

We act with courage, and enthusiasm to challenge the status quo, and discover new ways to grow our business.

Accountability:

We are accountable for our results to deliver our very best in everything with integrity and respect.

Excellence:

We strive for excellence by providing the best quality products and first-class services.

Customer Centric:

We offer flexible solutions based on the market needs and the customers requests.

Strategic Mindset:

We embrace a forward-thinking mindset to stay ahead of the curve every step of the way.

Relationships Matters:

We are keen to build strong relationships, with our employees, our customers, and the community.

Taking Responsibility for Our Actions and Outcomes

Responsibility:

We are committed to a clean future. We care about our customers and our impact on the environment. By committing to a sustainable production process, we deliver products that integrate your needs whilst being responsibly made.

Quality:

We strive to provide exceptional and consistent quality products, high-class service and flexibility to our customers. Ensuring consistent quality in our artificial grass is profoundly important.

Innovation:

Our production process is driven by innovation, incorporating cutting-edge machinery and technologies. By taking advantage of these developments, we continuously strive to enhance efficiency, precision, and overall product quality.

Innovative and Advanced Technology at our Purpose-Built Facilities

Yardex is adopting the latest technology to manufacture artificial grass with a wide range of specifications. Our process is designed to ensure maximum care for the environment. By adopting eco-friendly practices, we strive to minimize our carbon footprint and contribute towards a sustainable future.

At Yardex, we understand the significance of environmental sustainability. That's why our manufacturing process is accurately crafted for high efficiency whilst prioritizing environmental responsibility.

1 Raw Materials Selection

We source raw materials from top global manufacturers, ensuring the highest quality. Our products are made using non-toxic materials to provide VOC-free and lead-free options, prioritizing user safety.

2 Tufting

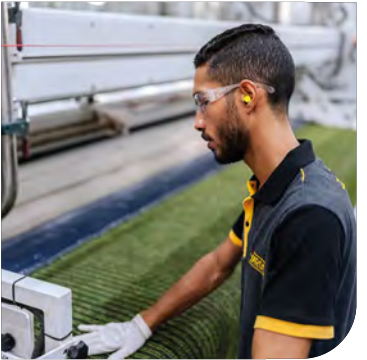

The most advanced tufting system in the industry offers high quality production with full synchronization and stability throughout the tufting process. A complex system of sensors monitors the performance of raw materials during production to ensure product quality.

Our tufting lines are designed to dynamically adapt to market needs, offering a wide range of setups and adjustments to cover all product ranges. One of our game changers is the ability to produce a very high capacity with high efficiency rarely seen on the market.

3 Coating & Drying

Our coating line is a combination of key players in the manufacturing industry, creating a masterpiece that can provide line stability with a coated product using latex or polyurethane. In today's environmentally attentive world, we understand the importance of minimizing our carbon footprint. That's why our coating line has been accurately designed and engineered to operate with low emissions, ensuring a sustainable solution for your business.

4 Product Wrapping

Our product wrapping technology is the latest in the field. It offers a compensation system that provides production stability and an inspection window before wrapping the turf rolls. With its new pneumatic tension control system, our grass is rolled and compacted to facilitate storage, handling and shipping.

Rigorous Testing For Superior Quality

Yardex ensures supreme excellence through precise testing aligned with international performance standards. Our commitment to quality is evident in every step of our production process.

Online Testing: Three-Point Assurance

Quality testing begins with online testing that includes three key checkpoints:

- **Raw Materials Inspection:** Rigorous testing of raw materials prior to production ensures premium quality.
- **Tufted Carpet Inspection:** Each strand is examined to ensure standards are met.
- **Coated Carpet Inspection:** A thorough evaluation of the coating process ensures product durability and resistance.

Yardex Laboratory: Precision Testing Hub

Our advanced equipment, tailored to various testing tasks, provides a competitive advantage in both static and dynamic performance.

- **Tuft Bind Testing:** Evaluates the resistance to force, which is critical for sports products.
- **Fiber Analysis:** In-depth analysis includes fibre thickness, characterization and Dtex, ensuring fiber consistency.
- **Tensile Strength:** Rigorous testing ensures robustness under various stress factors.
- **Water Permeability:** Careful testing ensures efficient water drainage, vital for enduring all weather conditions.
- **UV Resistance:** Our products are UV resistant and guarantee longevity even in strong sunlight.

Yardex’s Sustainable Approach to Artificial Turf

In its pursuit of sustainable, innovative and flexible solutions, Yardex takes a responsible approach every step of the way. Our commitment integrates health, safety and environmental considerations into our business, prioritizing people, communities and compliance for sustainable growth and productivity.

Responsible Sourcing and Management

We are implementing the ISO 14001 Environmental Management System, which ensures responsible sourcing of raw materials and careful process management. This approach guarantees consistent quality and environmental stewardship in our products.

Precision and Quality Control

The development of our processes allows us to carry out strict quality controls. Through the use of advanced automation, our turf meets the highest industry standards. Our facilities are now validated by the ISO 9001 Quality Management Standard, reflecting our focus on quality.

Standards for Environmental Protection

Yardex aligns with global environmental trends. We are promoting the use of clean energy and manufacturing eco-friendly products by eliminating any SOX, NOX, and CO2 emissions that may occur during manufacturing processes. Our technologies deliver products that are free of VOC (volatile organic compounds) and lead, prioritizing user safety.

Achieve Superior Performance with Sports Grass

Elevate your sporting facilities with the benefits of Yardex artificial grass. Our company takes pride in offering a wide range of high-quality turf options for various sports, including football (soccer), rugby, American football, hockey, tennis, paintball, golf, padel tennis, softball and lacrosse. Each sporting facility has unique requirements when it comes to choosing the right type of turf. Our team of experts is ready to assist you in selecting the most suitable artificial grass solution designed to your specific needs.

Whether you prefer tufted-in lines, laid-in markings, or tufted logos, we have the expertise and resources to deliver these solutions. Yardex has machinery that creates uniform tufts across the playing surface. Furthermore, our fields can be dedicated to multi-sport purposes, allowing you to maximize the utility of your facility.

Yardex has been officially recognised as a **Certified Turf Manufacturer under the International Hockey Federation (FIH) Quality Program**. We have also tested our products to meet **FIFA** standards and introduced a synthetic turf system that complies with **World Rugby** Regulation No. 22.

Synthetic Turf Sports Field Cross-Section

Advantage of Using Artificial Grass for Sport:

- Since low maintenance is required, artificial turf costs less overall than natural grass, although the initial investment is comparatively higher.
- Durability and resilience: artificial turf offers exceptional longevity and remains consistent over time, making it perfect for high-traffic areas like sports fields.
- Multipurpose capability of artificial grass: most surfaces designed with artificial turf can be used for a variety of sports without compromising performance.
- More playing hours: artificial grass provides longer playable hours for users.
- Increased revenue stream, because artificial grass endures more usage, it generates more revenue from rentals.
- Provides players with a firm but safe surface as it absorbs the impact of the body.

Unleash the Beauty of Your Landscape Grass

Yardex artificial grass is a smart and sensible choice for all kinds of indoor and outdoor spaces. Our artificial grass offers many advantages for landscape applications. With a range of options in terms of fibers, stitches, and pile heights, our product provides flexibility and customization to suit various landscaping needs.

Our artificial grass offers exceptional durability. It is designed to thrive in extreme weather conditions without losing its aesthetic appeal. This ensures that landscape or leisure areas remains green and lush all year round, regardless of the climate.

Our synthetic turf can be used in a wide range of recreational areas, whether it's outdoors, swimming pool surrounds, indoor décor, space for pets or playgrounds.

The Yardex team consists of skilled professionals who have extensive experience in installing artificial grass for various commercial and residential projects.

Advantage of Using Artificial Grass for Landscape:

- Reduced Maintenance: maintaining natural grass fields requires significantly more time, effort, and resources than artificial grass.
- Mowing, fertilizing, or seeding are not needed.
- Environmentally friendly – saves water
- All-weather grass, stays green all year round and is leading to fewer event cancellations.

With artificial turf, you can save both time and resources while maintaining a beautiful green space all year round.

Why Choose Artificial Turf?

- Artificial turf is a surface of tufted synthetic fibers that looks like and performs like grass.
- The systems emulate the appearance, feel and biomechanical properties of natural grass.
- Average life span ranges from 10 to 20 years,
- More than 50 independent and credible studies have validated the safety of synthetic turf.

Environmentally Friendly

- Artificial turf saves thousands of gallons of water a year.
- Eliminates the use of fertilizers and herbicides entering the natural environment.
- Recyclable, composed of mixed polymers.

Innovative Grass Design Products

Yardex offers a wide range of superior e-tuft products that are made-to-order. Whether you need a logo for corporate branding, a sports club or school facility, elements for children's playgrounds, or outdoor carpet, Yardex has what you need.

Perfect for Sports

Our design products can be integrated into sports fields to help promote the club or sponsors. Very often they are used as entrance mats or as a colorful technical area for managers and substitutes.

High performance, durable products add value to sports discipline. Our grass products are excellent for training areas, circuit training, dribbling for soccer or practicing golf.

Inspiring and Safe for Children

Fairy tale characters or colorful surfaces on your playground, children's corner, or indoor area will bring joy to the youngest and enrich their experience.

Yardex ensures safe and non-toxic products for children and pets. Our products are free from VOC (volatile organic compounds), lead, and condominiums.

Beautify Commercial Spaces

Our technology ensures that each piece of artificial turf is precisely crafted to provide attractive, vibrant color and presentation for your graphic design mat, wall décor or outdoor rug.

Yardex products adapt to your specific needs and esthetic preferences to create exceptional and functional commercial spaces; ideal for hospitality gardens, patios or high-traffic areas, easy to clean and usable all year round.

INSPIRING NEW POSSIBILITIES

Let's talk about your project

We want our partners to grow their businesses by benefiting from flexible solutions, such as made-to-order products and short delivery timeframes. Whether you need artificial turf for your sports facility or field construction project or want to enhance your product range or landscape in a previously neglected area, we are here to help.
